

FIN'S MOUTH GUARD INSTRUCTIONS!

1. First, make sure that the swivel lever (where the lock goes) is in the open position (flipped up). Then, holding the mouth guard in an upright position (same direction as if it was in place), insert the top of the guard into the top of FIN's mouth.

2. Next, angling the bottom of the guard away from you (towards the back of FIN), and keeping the top inside FIN's mouth, slip the bottom part of the guard over FIN's lower lip and into FIN's mouth.

3. So it looks like this ...!

4. Finally, just slide the back part of the mouth guard into place—moving the back of the guard to your left. This will work only if the lever is flipped up of course!

5. Lock lever into place! GREAT JOB!

6. and then...do it again just for fun...:)
